Village of Cottage Grove

WATER UTILITY RATE INCREASE

The Utility Commission ordered a rate study be performed when the rate of return on the Village of Cottage Grove Water Utility dipped to .6% in 2009. The Commission had deferred the rate study and any potential increase in 2009 to lessen the impact to consumers overall after the Sewer Utility rates increased in 2009.

The rate study is being performed by Baker Tilly f/k/a Virchow, Krause & Company and a draft is expected to be completed sometime in August.

Any increase or request for increase must first be approved by the Public Service Commission of Wisconsin and likely will be implemented in 2011.

All meetings of the Utility Commission are open to the public and the public is encouraged to attend.

Kim Manley, Administrator
